

Portland FSDO FAAS Team presents:

# **Me-Myself-and I -- How Pilot Personality Traits are Linked to Aeronautical Decision Making**

Do you know your Big 5 Personality Traits? It's well understood that our individual personalities affect our behaviors. As pilots, our personalities impact our decision making processes. In this meeting you will learn about the personality traits that have been linked to a common "pilot personality profile" and to pilot performance and success in aeronautical decision making (ADM). What are these traits, do you have some or all of them and what can you do about if your pilot personality traits interfere with your piloting decision making and error management skills? If you are interested in measuring your Big Five Personality Domains before this meeting here are two non-commercial websites that provide psychological tests to find out about your personality.
